

MIDSS # 0092
HIGH POND
PIERCE POND TWP. (T2R4), SOMERSET CO., MAINE
AREA 7 ACRES

HIGH POND

Pierce Pond Twp., Somerset County
U.S.G.S. Pierce Pond, Maine (7½')

Fishes

Brook trout

Physical Characteristics

Area - 7 acres

Maximum depth - 25 feet

Principal fishery: Brook trout

Temperatures:

Surface - 72°F

23 feet - 68°F

High Pond is located high on the south side of Pierce Pond Mountain. The pond has no major inlets, but an outlet that flows southwest into Fish Pond. The pond's shoreline is undeveloped.

Water quality in High Pond is good for coldwater gamefish. A small spring on the north shore provides the good spawning habitat needed for a population of native brook trout to maintain a fishery. Trout growth is good due to the lack of competing fish species. The pond is not stocked.

High Pond is accessible via a long foot trail leaving the parking area at Lindsay Cove on Pierce Pond. The pond is open to fishing with no live fish as bait in the summer and closed to fishing in the winter. See the lawbook for additional regulations.

Surveyed - July, 1987
